

In the Specification:

Please replace the paragraph at page 5, lines 16-21 with the following:

6 A particular use for the coating is that it subsequently holds together the core 14, and also provides it with a uniform visual appearance, while the product is being stored in a non-congealed state, in particular at a temperature lying in the range 2°C to 8°C (normal temperatures for storing fresh non-frozen milk products).
